

HANAN SAEED

CYBER SECURITY RESEARCHER & PYTHON DEVELOPER

Email: hanansaeed609@yahoo.com | Phone: +92 3700626055 | Location: Multan, Pakistan

GitHub: github.com/hannansaeed | LinkedIn: linkedin.com/in/hanan-saeed | Portfolio: hannansaeed.github.io/portfolio

PROFESSIONAL SUMMARY

Cyber security researcher and Python developer specializing in offensive/defensive tooling, automated vulnerability assessment, and AI-driven automation. Practical expertise in low-level systems, OWASP Top 10 web exploitation, and real-time telemetry pipelines.

EDUCATION

B.S. in Information Technology

Bahauddin Zakariya University (BZU) | 10/2023 - Present

Specialization in offensive cyber vectors, automated vulnerability testing, and security systems.

Pre-Engineering / ICS

Govt. Graduate College of Science | 09/2021 - 09/2023

Foundations of computer systems, architecture, and mathematics.

SECURITY & DEVELOPMENT PROJECTS

Network Vulnerability Scanner

Python, Nmap, Asynchronous CVE APIs

- Automated reconnaissance tool scanning hosts and open ports, fingerprinting services against live CVE databases.
- Generates structured risk-severity reports prioritizing remediation vectors.

Web Application Pentesting Toolkit

Python, OWASP Top 10, BeautifulSoup, Requests

- Modular exploit framework automating checks for SQL Injection, Cross-Site Scripting (XSS), and CSRF.
- Features automated forms crawling, cookie session parsing, and trace buffer analysis.

Security Alert & Incident Automation Bot

Python, Discord API, Linux Syslog

- Real-time daemon monitoring Linux syslog telemetry (auth.log, web access) for intrusion signatures.
- Instant webhook dispatch alerts with embedded diagnostics inside Discord channels.

Secure Mobile Application

Kotlin, Android Studio, Firebase, SQLCipher

- Hardened Android application featuring MVVM architecture, encrypted local SQLCipher storage, and strict Firebase Firestore cloud rule policies.

TECHNICAL SKILLS

Languages: Python, Kotlin, C/C++, Rust, TypeScript, JavaScript, SQL, Bash

Security: Vulnerability Assessment, OWASP Top 10, Nmap, Network Reconnaissance, Cryptography

Platforms & Tools: Linux/Unix, Git/GitHub, Firebase (Auth/Firestore), Docker, Three.js, React

CERTIFICATIONS & HONORS

- Certified Ethical Hacker Training & Practical Security Research
- Open Source Security Tooling & Vulnerability Research Contributions
- Academic Distinction in Computer Systems & Cybersecurity
